1 Example-11 Grams into Kilogram

```c
 #include <stdio.h>
int main() {
    float grams, kg;
    printf("Enter grams: ");
    scanf("%f", &grams);
    kg = grams / 1000;
    printf("Kilograms = %.2f\n", kg);
    return 0;
}
```
