1   Example-10 Dollars into Pounds

```c
 #include <stdio.h>
int main() {
    float dollars, pounds;
    printf("Enter dollars: ");
    scanf("%f", &dollars);
    pounds = (dollars * 48) / 70;
    printf("Pounds = %.2f\n", pounds);
    return 0;
}
```
