1 Example-14 Celsius to Fahrenheit

```c
#include <stdio.h>
int main() {
    float celsius, fahrenheit;
    printf("Enter temperature in Celsius: ");
    scanf("%f", &celsius);
    fahrenheit = (9.0 / 5) * celsius + 32;
    printf("Fahrenheit = %.2f\n", fahrenheit);
    return 0;
}
```
